12171, Jalan Cendrawasih 9, Bandar Putra, 81000 Kulai
(Willing to Relocate)

Career Objective

High-achieving Computer Science (Software Engineering) graduate with practical experience developing AI/ML-driven backend applications. Proven track record integrating LLMs (Ollama/Qwen), building vector database pipelines (pgvector/PostgreSQL), and deploying software solutions across multiple internships. Seeking an **entry-level** Software Engineer or AI/ML Developer role to build scalable tech solutions.

Key Skills

- Languages: C, C#, PHP, Python, MATLAB, JavaScript
- Frameworks: ASP.Net, .NET Framework, Laravel, jQuery, AJAX, JSON
- Databases: MSSQL, MySQL, PostgreSQL, SQLite
- AI /Tooling: Ollama, Qwen, Vector databases, Machine learning classifiers

Experience

Teknoware Asia Sdn Bhd

IT Support Intern, May 2026 – Aug 2026

- Resolved daily hardware, software, and network issues to maintain high system uptime
- Configured and deployed workstations, printers, and peripheral equipment
- Maintained networks and monitored system performance for preventive upkeep
- Tracked IT inventory records and managed hardware documentation
- Supported the core IT team on active projects and daily operational tasks

Imagine AI Sdn Bhd

Software Engineering Intern, March 2026 – May 2026

- Developed proof of concept (POC) for object character recognition application (OCR Studio) for digitalizing documents from picture
- Built a document summarization chatbot by integrating Ollama and Qwen AI models for localized text processing.
- Implemented semantic search functionality by generating text embeddings and storing them in a PostgreSQL database using pgvector for efficient similarity queries

Cybersphere Solutions Sdn. Bhd., Pekan, Pahang

Back-end Developer, October 2023 – May 2024

- Contributed to the backend development of "DietMate," a specialized nutrition consultation system for diabetic patients.
- Built an automated calorie-calculation feature to help users monitor and track daily dietary intake.

J.K. Wire Harness Sdn. Bhd., Johor Bahru, Johor

IT Practical Trainee, August 2022-March 2023

- Provide first-level support to staff to reduce downtime
- Created Technical Barcode Machine System (TBMS) to increase productivity for Assembly Department
- Created Terminal Cable in Calculator (TCIC) to reduce human error for Inventory Department

Skills

Technical Skills

- Built and maintain an inventory system to centralized cable data for company using .Net Framework, Microsoft Excel and C#
- Build a web application using Laravel framework for several university project including E-Tasmik
- Develop a steganography flow using LSB in video steganography with integration of machine learning classification Random Forest, Decision Tree and SVM

Teamwork Skills

- Assist developer team in building and maintaining DietMate web applications
- Effective communication skills with teammate in several university project

Interpersonal Skills

Facilitator Scratch Program Faculty of Computing, 18 November 2023

- Supervised more than 30 students undertaking Scratch tutorial
- Assist students and guardians for inquiries regarding program flows

Education

- **Universiti Malaysia Pahang As-Sultan Abdullah, Pekan, Pahang**
Bachelors in Computer Science (Software Engineering) With Honours, Expected Graduation: Nov 2026
Final Year Project: Enhancing Security and Privacy of Video Steganography By integration of Machine Learning in Motion Tracking
CGPA: 3.41/4.0
- **Universiti Malaysia Pahang As-Sultan Abdullah, Pekan, Pahang**
Diploma in Computer Science, Feb 2023
Final Year Project: E-Tasmik for primary school students
CGPA: 3.67/4.0

Honors and Activities

- Dean's list 2021 – 2025
- Participant, V-Hack 2022
- Participant, F.I.N.A.L.E 2022
- Scratch Program Faculty of Computing 2023

Languages

- Bahasa Melayu (Native)
- English (Intermediate)
